APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This amended permit is issued subject to all existing rights on the source. A substantial headgate and measuring device must be installed and maintained to facilitate the measurement and control of water. The State retains the right to regulate the use of water herein granted at any and all times.

Proofs of Commencement of Work and Completion filed previous to the date of this amended permit satisfy the requirement of filing these proofs under this permit.

This amended permit is issued to bring the terms of the permit into conformity with the source described in the application, as the original terms were inadvertently written for a ground water source rather than the surface water source described in the application. All other terms, conditions, and dates remain the same as set forth previously. This amended permit is issued in accordance with the State Engineer's Ruling of July 28, 1970.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3,000 cubic feet per second, but not to exceed a duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Actual construction work shall begin on or before February 26, 1971
Proof of commencement of work shall be filed before March 26, 1971
Work must be prosecuted with reasonable diligence and be completed on or before February 26, 1972
Proof of completion of work shall be filed before March 26, 1972
Application of water to beneficial use shall be made on or before February 26, 1975
Proof of the application of water to beneficial use shall be filed on or before March 26, 1975
Map in support of proof of beneficial use shall be filed on or before March 26, 1975

Commencement of work filed Mar. 16, 1971
Completion of work filed Mar. 16, 1971

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. A substantial weir or other type of measuring device must be installed and measurements of water use kept. The well shall be equipped with a 2-inch opening for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times. This permit is issued in accordance with the State Engineer's ruling of July 28, 1970.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and a duty not to exceed 3,000 cubic feet per second, but not to exceed 4.0 acre-feet per acre of land irrigated from any and/or all sources.
